

# Wallingford Plus\* Solar Streets

## COMMUNITY SOLAR PROJECT

*\*including Crowmarsh Gifford, Cholsey & Benson*

12 Panel  
4kWp system  
Installation from  
just £4,000\*  
*\*average 3-4 bed  
house*

### CLEAN ENERGY – LOWER BILLS – CUT CARBON EMISSIONS

Sustainable Wallingford is pleased to support this community solar panel scheme. Solar PV installer IDDEA is making discounted panels available to homeowners and businesses in Wallingford and the surrounding area. A Community Fund will be created, and the proceeds will be used for Green Projects

A £50 donation will be given by IDDEA to a community fund for every domestic solar installation and £100 for a commercial installation - it's a Win Win

# BOOK YOUR FREE HOME SURVEY

[www.IDDEA.co.uk](http://www.IDDEA.co.uk)

Normally, one of IDDEA's team would visit your home, design your system and show you the financial benefits and carbon emission savings. Because we are not in normal times, we will do all the design and advice over the phone and across email with you. The installation can go ahead even if we are in lockdown as it is classed as permitted Construction.

Established in 2008, IDDEA have installed over 1,000 solar projects across the South and are committed to supporting communities to take action against climate change. Quote "Wallingford" when you email [info@IDDEA.co.uk](mailto:info@IDDEA.co.uk) or phone 01380 726999

## FINANCIAL AND ENVIRONMENTAL BENEFITS

- Take control of your energy costs
- Generate clean energy
- Take action against climate change
- Reduce your carbon emissions
- Improve your home's energy rating
- Become more self-sufficient

### Catherine Somerville, Sustainable Wallingford

"when Wallingford Town Council declared a Climate Emergency, we tried to find ways to reduce Wallingford's carbon footprint. Solar Streets is an important way for us to achieve this – it saves residents money, generates our own electricity, and saves approx. 1 Tonne of carbon for each residential installation."

The Standard Offering is a 12 panel 4kWp system including installation. Smaller and Larger Discounted Systems are available plus add-ons like batteries and iBOOST to heat water. £50 is given to the Community Fund for every Residential Installation and a £100 for every Commercial - Funds to be used on Green Community Projects. Approx 1 Tonne of carbon is saved per annum with each average residential installation – [www.energysavingtrust.co.uk](http://www.energysavingtrust.co.uk)
